

DESIGN SUGGESTIONS

EASYSET
METAL
STORE FRONTS

PITTSBURGH PLATE GLASS CO.

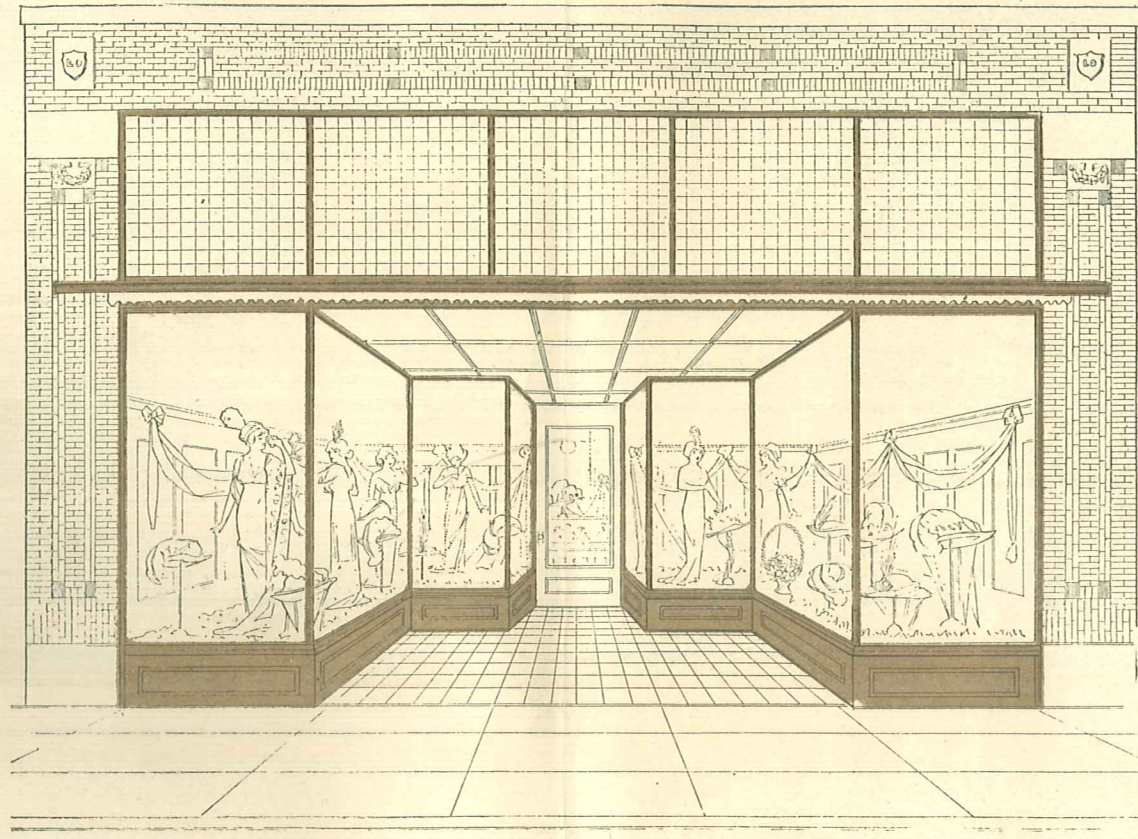

THE SILENT SALESMAN

INTRODUCTION

We take pleasure in submitting herewith a series of twenty designs of Metal Store Fronts, in the hope that to the Architect they will be of assistance in facilitating his task of caring for the unusual large amount of Store Front Remodeling which we feel sure will take place in the immediate future, partly due to the prohibition laws and partly to the era of general prosperity which is before us, and also to the property owner or tenant who contemplates remodeling his Store Front in determining the type to be used, in which case the design selected may be submitted to his Architect for further detailed specifications, etc.

Easyset Construction is too well known to need extensive comment. It has been on the market for years and has proven its worth. It is durable and sightly and adds very much to the appearance of merchandise displayed.

When completed it will look like this

It does away entirely with the necessity of periodically repairing or renovating the store front, thus in a short period of years more than saving the first cost.

The fire insurance underwriters look more favorably on metal than wood, which means in a good many cases a lower rate.

With hardly an exception, a tenant, on account of the superior appearance and the advertising feature, will gladly pay in additional rent the equivalent of the interest on this extra investment, which amounts to only a few dollars per year.

Our system has been installed in thousands of stores throughout the the continent and has given excellent satisfaction. Expressions received from our patrons indicate they regard it as even more than fulfilling all we claim for it.

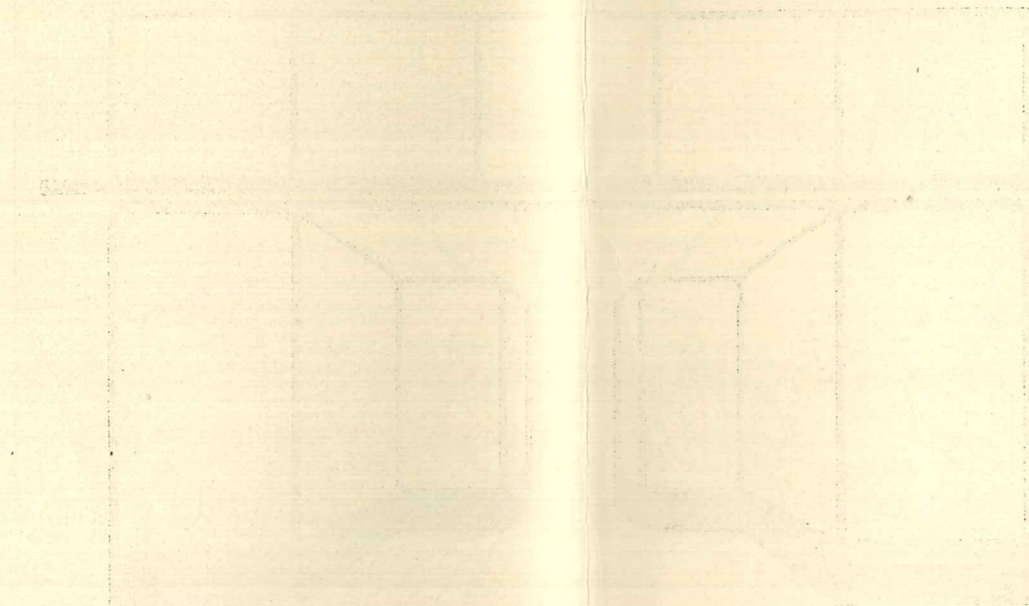

"EASYSET" can be furnished in solid Copper or Bronze, or in other finishes, such as Statuary Copper, Nickel, Gun Metal, Etc.

Heartily endorsed by architects throughout the United States and Canada.
